## **Hospitality**

The list of solutions below comprises of vendors available at TD SYNNEX designed for hospitality use cases and scenarios. See the table for the different types of solutions for hospitality.

Developer Name	Product Name	Product Overview	Features
AdLink Technology	Vizi-Al <u>Learn More</u>	Vizi-Al combines plug-and-play hardware and software to enable a faster, easier and more scalable starting point for machine vision Al deployments at the edge. Initial deployments can be scaled for industrial requirements using the same software but deployed on more powerful hardware, as needed.	<ul> <li>Enables development of computer vision solutions</li> <li>Connects to different image capture devices</li> <li>Supports people identification, as well as human behavior detection and analysis</li> <li>Performs image recognition and classification</li> </ul>
AxxonSoft	AxxonSoft Al Analytics Tools Learn More	AxxonSoft AI analytics tools use the Intel® Distribution of OpenVINO™ toolkit to create neural networks for computer vision use cases.	<ul> <li>Predict dangerous behavior</li> <li>Detect fire and smoke</li> <li>Locate suspicious items left in public areas</li> <li>Search for specific objects, such as humans or vehicles</li> </ul>
Cathexis	CathexisVision Video Management Software and Video Analytics Learn More	Video surveillance management software with AI tools to enhance operations. Its qualities include enhanced reliability, analytics, integration with third-party systems and low cost.	<ul><li>Video analytics/AI</li><li>Smart video search</li><li>Integrated solutions</li><li>Alarm management</li></ul>
Fujitsu	Fujitsu Sentiment Analyzer <u>Learn More</u>	The Fujitsu Sentiment Analyzer solution analyzes English or German language text, such as Tweets and input text, for sentiment. It allows businesses to quickly get an understanding of a general sentiment toward their brand and products.	<ul> <li>Analyzes accumulative customer feedback towards a topic or a product</li> <li>Provides understanding for how feedback varies by customer location</li> <li>Shows how feedback towards a product changes over time</li> </ul>

## Hospitality

Developer Name	Product Name	Product Overview	Features
IBM Software	IBM Watson Natural Language Understanding <u>Learn More</u>	IBM Watson Natural Language Understanding uses deep learning to extract meaning and metadata from unstructured text data. Get underneath company data using text analytics to extract categories, classification, entities, keywords, sentiment, emotion, relations and syntax.	<ul> <li>Surface real-time actionable insights</li> <li>Pulls metadata and patterns from massive troves of data</li> <li>Deployable on any cloud platform</li> </ul>
Intelligent Security Systems (ISS)	SecurOS Auto Learn More	The SecurOS Auto solution provides the ability to accurately capture license plate information at 155 mph (250 km/h) and in all kinds of weather conditions, including fog, rain and snow.	<ul> <li>Deep learning for traffic management and smart cities</li> <li>Offers automatic number plate recognition</li> <li>Camera-agnostic solution</li> </ul>
NodeWeaver	NodeWeaver Edge Cloud <u>Learn More</u>	NodeWeaver is a software-defined operating platform that simplifies the deployment, management and orchestration of edge infrastructure and applications. Optimized for running multiple workloads at the edge, NodeWeaver dramatically reduces cost of ownership by simplifying operations and reducing the need for IT expertise or human intervention.	<ul> <li>Zero-touch installation</li> <li>Autonomic operational management desktop-as-a-service functions at no extra cost</li> <li>No need for external SANS</li> </ul>
