

The list of solutions below comprises of vendors available at TD SYNnex designed for government use cases and scenarios. See the table for the different types of solutions for government.

Developer Name	Product Name	Product Overview	Features
AdLink Technology	Vizi-AI <a href="#">Learn More</a>	Vizi-AI combines plug-and-play hardware and software to enable a faster, easier and more scalable starting point for machine vision AI deployments at the edge. Initial deployments can be scaled for industrial requirements using the same software but deployed on more powerful hardware, as needed.	<ul style="list-style-type: none"> <li>• Enables development of computer vision solutions</li> <li>• Connects to different image capture devices</li> <li>• Supports people identification, as well as human behavior detection and analysis</li> <li>• Performs image recognition and classification</li> </ul>
Agent Vi	City Surveillance: Crowd Detection <a href="#">Learn More</a>	Leverage the masses of video footage captured across metropolitan areas to enhance safety and security across the city and improve traffic management.	<ul style="list-style-type: none"> <li>• Traffic management capabilities</li> <li>• Video monitoring</li> <li>• Video analytics</li> <li>• Crowd behavior analysis</li> </ul>
AxxonSoft	AxxonSoft AI Analytics Tools <a href="#">Learn More</a>	AxxonSoft AI analytics tools use the Intel® Distribution of OpenVINO™ toolkit to create neural networks for computer vision use cases.	<ul style="list-style-type: none"> <li>• Predict dangerous behavior</li> <li>• Detect fire and smoke</li> <li>• Locate suspicious items left in public areas</li> <li>• Search for specific objects, such as humans or vehicles</li> </ul>
Cathexis	CathexisVision Video Management Software and Video Analytics <a href="#">Learn More</a>	Video surveillance management software with AI tools to enhance operations. Its qualities include enhanced reliability, analytics, integration with third-party systems and low cost.	<ul style="list-style-type: none"> <li>• Video analytics/AI</li> <li>• Smart video search</li> <li>• Integrated solutions</li> <li>• Alarm management</li> </ul>
IBM Software	IBM Watson Natural Language Understanding <a href="#">Learn More</a>	IBM Watson Natural Language Understanding uses deep learning to extract meaning and metadata from unstructured text data. Get underneath company data using text analytics to extract categories, classification, entities, keywords, sentiment, emotion, relations and syntax.	<ul style="list-style-type: none"> <li>• Surface real-time actionable insights</li> <li>• Pulls metadata and patterns from massive troves of data</li> <li>• Deployable on any cloud platform</li> </ul>

Developer Name	Product Name	Product Overview	Features
Intelligent Security Systems (ISS)	SecurOS Auto <a href="#">Learn More</a>	The SecurOS Auto solution provides the ability to accurately capture license plate information at 155 mph (250 km/h) and in all kinds of weather conditions, including fog, rain and snow.	<ul style="list-style-type: none"> <li>• Deep learning for traffic management and smart cities</li> <li>• Offers automatic number plate recognition</li> <li>• Camera-agnostic solution</li> </ul>
meldCX	Viana <a href="#">Learn More</a>	meldCX Viana uses AI vision and edge inferencing to help end users capture data and produce anonymous audience analytics measuring how their customers work, shop, learn and play in physical and digital environments to guide intelligent decision making.	<ul style="list-style-type: none"> <li>• Anonymous vision analytics</li> <li>• Content performance insights</li> <li>• Traffic measurement</li> <li>• License plate recognition</li> </ul>
NodeWeaver	NodeWeaver Edge Cloud <a href="#">Learn More</a>	NodeWeaver is a software-defined operating platform that simplifies the deployment, management and orchestration of edge infrastructure and applications. Optimized for running multiple workloads at the edge, NodeWeaver dramatically reduces cost of ownership by simplifying operations and reducing the need for IT expertise or human intervention.	<ul style="list-style-type: none"> <li>• Zero-touch installation</li> <li>• Autonomic operational management desktop-as-a-service functions at no extra cost</li> <li>• No need for external SANS</li> </ul>
