Smart Cities

The list of solutions below comprises of vendors available at TD SYNNEX designed for smart city use cases and scenarios. See the table for the different types of solutions for smart cities.

Developer Name	Product Name	Product Overview	Features
AdLink Technology	Vizi-Al <u>Learn More</u>	Vizi-Al combines plug-and-play hardware and software to enable a faster, easier and more scalable starting point for machine vision Al deployments at the edge. Initial deployments can be scaled for industrial requirements using the same software but deployed on more powerful hardware, as needed.	 Enables development of computer vision solutions Connects to different image capture devices Supports people identification, as well as human behavior detection and analysis Performs image recognition and classification
Agent Vi	City Surveillance: Crowd Detection Learn More	Leverage the masses of video footage captured across metropolitan areas to enhance safety and security across the city and improve traffic management.	Traffic management capabilitiesVideo monitoringVideo analyticsCrowd behavior analysis
AxxonSoft	AxxonSoft AI Analytics Tools Learn More	AxxonSoft AI analytics tools use the Intel® Distribution of OpenVINO™ toolkit to create neural networks for computer vision use cases.	 Predict dangerous behavior Detect fire and smoke Locate suspicious items left in public areas Search for specific objects, such as humans or vehicles
Cathexis	CathexisVision Video Management Software and Video Analytics Learn More	Video surveillance management software with AI tools to enhance operations. Its qualities include enhanced reliability, analytics, integration with third-party systems and low cost	Video analytics/AISmart video searchIntegrated solutionsAlarm management

Smart Cities

Developer Name	Product Name	Product Overview	Features
Genetec	Security Center Learn More	An IP video management solution (VMS) that gives you a clear picture of events and empowers you to quickly react to threats.	Integrates with existing infrastructureEvent identification and searchfunction
Intelligent Security Systems (ISS)	SecurOS Auto Learn More	The SecurOS Auto solution provides the ability to accurately capture license plate information at 155 mph (250 km/h) and in all kinds of weather conditions, including fog, rain and snow.	 Deep learning for traffic management and smart cities Offers automatic number plate recognition Camera-agnostic solution
