

# Tech Data Modern Workplace with Secure Score

Establish a security baseline while gaining insights into your customers security position. Partners can leverage the guidance offered by Microsoft Secure Score to identify potential security risks and quickly learn what security features are available to reduce the risk without sacrificing productivity.

Secure Score will help you track and schedule incremental improvements over time and establish a long-term security plan. Save time and increase efficiencies by using Azure Automation runbooks to automate frequent, time consuming and error prone IT management tasks such as new user deployment with approved security policies.

# Market Overview

According to Accenture's annual cost of Cybercrime study 2019, it is reported that the average cost of cybercrime increased to \$13 Million in 2018 and estimates \$5.2 trillion value at risk if security investments are not made.

Organizations should leverage technologies that reduce rising costs such as automation, advanced analytics and security intelligence to manage risks and rising costs associated with discovering vulnerabilities. Additional prioritization should be focused on protection against people-based attacks.

Our Modern Workplace Solution Practice enables partners to leverage click to run solutions that drive business outcomes. This includes our Modern Workplace with Secure Score that helps Improve security posture and performance by helping partners identify security risks with the Office 365 environment and recommendations to mitigate potential risks. Tech Data's Secure Score solution is configured with Azure Automation run books to orchestrate IT management tasks such as the security policies for new users.

# Tech Data Secure Score with Azure Automation

Tech Data's Modern Workplace with Secure Score establishes crucial security settings based on industry best practices and creates an Azure Automation runbook account designed to implement Mailbox and Data Loss Prevention Policies whenever new users are created.

Tech Data Secure score with Azure Automation enforces Multi-Factor Authentication for Global Admin users along with password reset policies as a baseline for the Office 365 tenant. These configurations award points toward the overall Secure Score. Additional recommendations can be viewed from the Secure Score Dashboard along with details about features, tasks and reports available to address your customer security posture.

Into the cloud	An automated deployment of best practice security settings for Office 365 users and Global Administrators.
Manage Risk	Establish a security baseline, increase awareness and identify security priorities with Microsoft Secure Score.
Intelligence	Gain insights into your security position all from the Secure Score dashboard to understand what features you have enabled.
Guidance	Quickly learn and identify what features are available to implement that can help reduce risks while balancing productivity and security.
Cost-Efficient	Pre-configure your tenant with security best practices and apply security settings automatically to new users with Azure runbooks at little or no cost.

# Why Tech Data Secure Score with Azure Automation

Your company delivers modern workplace solutions to small and midsize enterprises who want to benefit from your expertise and solutions to effectively balance security and productivity to enable a digital and secure workforce.

You can help them establish a security baseline and take action to improve their secure score and improve their security posture with the least amount of impact to user productivity.

- **Easy to buy** – 3 ways to buy: pre-configured ‘click to run’ solutions/configure your own/a managed solution.
